### **Anatomy - School of Medicine - Trinity College Dublin**

This event emphasizes understanding of basic meteorological principles with emphasis on analysis and interpretation of meteorological data, graphs, charts and images.

### **Meteorology | Science Olympiad**

The vital importance of the heart is obvious. If one assumes an average rate of contraction of 75 contractions per minute, a human heart would contract approximately 108,000 times in one day, more than 39 million times in one year, and nearly 3 billion times during a 75-year lifespan.

### **Heart Anatomy Â· Anatomy and Physiology**

This entry focuses on new developments in the burgeoning field of acoustical science that emerged in the mid-to-late-nineteenth century. During this time, sound science began to flourish in England, particularly through lectures by Hermann von Helmholtz and John Tyndall at the Royal Institution.
