You can't kill/rollback a transaction from another session without killing the owner session. I think, allowing to kill/rollback a transaction from another user's session means many design and security rule violations because it requires entering another user session (in the context of the current sql server engine design).

sql - How to kill or rollback active transaction? - Stack

Theistic evolution is the idea that God started or directed evolutionary processes. This view makes God a bumbling, incompetent Creator and the author of death and suffering as it puts them before mankind's sin.
