Overview. The most basic type of integral equation is called a Fredholm equation of the first type,  $\hat{a} \ll (, ) ()$ . The notation follows Arfken. Here  $\ddagger$  is an unknown function,  $f$  is a known function, and  $K$  is another known function of two variables, often called the kernel function.

### **Integral equation - Wikipedia**

In physical science and mathematics, Legendre polynomials (named after Adrien-Marie Legendre, who discovered them in 1782) are a system of complete and orthogonal polynomials, with a vast number of mathematically beautiful properties, and numerous applications.
