html + css provide a lot of way to customize your layout. The language is designed to render contents. even if you create a intermediate html page to generate the pdf, it will always be faster than counting pixels of your text who may be contains line breaks.

Generate PDF Files using PHP Scripts | Web Development Blog

The beginning and intermediate-level tutorials on this page were originally based on the second edition of Marty's book Core Servlets and JavaServer Pages, but have been extensively upgraded since then, including coverage of servlets 3.0 and JSP 2.2 (e.g., for Tomcat 7).

JSP Tutorial. Servlet Tutorial. Beginning and Intermediate

The answer is simple: it depends. If tables are used to solve a specific problem that current CSS versions can't, they are well used. If you start getting tables inside tables, inside millions of tables then you're doing it wrong.

css - Why not use tables for layout in HTML? - Stack Overflow

Anchor links 1 may have a target attribute which controls what happens when that link is clicked. One of the possible values of that attribute is `_blank`, which tells the browser to open a new window (or tab, if that's the user's preference) when that link is clicked.

When to use target="_blank" | CSS-Tricks

PDF (Portable Document Format) PDF is a universal file format that preserves the fonts, images, graphics, and layout of any source document, regardless of the application and platform that were used to create it.
