

## **big solutions to water pdf**

Thus, water pollution is all about quantities: how much of a polluting substance is released and how big a volume of water it is released into. A small quantity of a toxic chemical may have little impact if it is spilled into the ocean from a ship. But the same amount of the same chemical can have a much bigger impact pumped into a lake or river, where there is less clean water to disperse it.

â€ˆ Conserve water & Reducing Pollution from Oil and Petroleum Liquids The first-level solution to this type of water pollution is to stop letting so much oil and oil byproducts get into the water in the first place. Yes, we must reduce the occurrences of oil spills; but more importantly, we must reduce the amount of petroleum pollution getting into waterways from non-spill sources, which ...
