Phonemes. A phoneme of a language or dialect is an abstraction of a speech sound or of a group of different sounds which are all perceived to have the same function by speakers of that particular language or dialect.

### **English phonology - Wikipedia**

Phonetics is a branch of linguistics that studies the sounds of human speech, or "in the case of sign languages" the equivalent aspects of sign. It is concerned with the physical properties of speech sounds or signs : their physiological production, acoustic properties, auditory perception, and neurophysiological status.
