Student Teachers Learning Through Inquiry: International

Experimental research designs are important because they minimize threats to internal validity. Internal

validity is the confidence a researcher has that a change (whether naturally occurring or due to manipulation) in the independent variable causes the observed change in the dependent variable.

Experimental designs in management and leadership research

Listening to music or talking on the phone while cycling as well as the growing number of quiet (electric) cars on the road can make the use of auditory cues challenging for cyclists.

Mobile phone conversations, listening to music and quiet
