The Fisher-Behrens problem is the determination of a test for the equality of means for two normal distributions with different variances. The normal distribution function gives the probability that a standard normal variate assumes a value in the interval ,

Normal Distribution -- from Wolfram MathWorld

Depending on constituents and volume fraction, there is a wide range of possible ply properties for GFRP. The difficulty in experimental determination of ply properties in filament wound composite pipes is due to the inherent filament winding interweaving patterns, curvature and lack of knowledge regarding the chemical composition of the ...
