Deep Adaptation: A Map for Navigating Climate Tragedy

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate.

Life - Wikipedia

Abiogenesis, or informally the origin of life, is the natural process by which life has arisen from non-living matter, such as simple organic compounds.

Abiogenesis - Wikipedia

In science, as in life, you usually get things wrong over and over again before you get it right. That's particularly true whenever you're trying something new; no one is born an expert at anything.
