2 SYSTEMS OF THE BODY ORGANIZATION OF THE NERVOUS SYSTEM 1 Introduction The nervous system, which consists of the brain, spinal cord and peripheral nerves, is a highly specialized and

### **ORGANIZATION OF THE NERVOUS SYSTEM**

The nervous system is comprised of two major parts, or subdivisions, the central nervous system (CNS) and the peripheral nervous system (PNS). The CNS includes the brain and spinal cord. The brain is the body's "control center". The CNS has various centers located within it that carry out the sensory, motor and integration of data. These centers can be subdivided to Lower Centers (including ...

Nervous System Organization Last update: Oct 20th, 2017 Nerves also contain neurons of the visceral or autonomic nervous system (ANS), which connect the central nervous system (CNS) to the viscera.

### **Organization of the Autonomic System - GetBodySmart**

Structural organization of the nervous system Nervous systems One of the characteristics of higher animals is their possession of a more or less elaborate system for the rapid transfer of information through the body in the form of electrical signals, or nervous impulses. At the bottom of the evolutionary scale, the nervous system of some primitive invertebrates consists simply of an ...
