Process Control_ Modeling, Design and Simulation - B

Automatic process control in continuous production processes is a combination of control engineering and chemical engineering disciplines that uses industrial control systems to achieve a production level of consistency, economy and safety which could not be achieved purely by human manual control.

Process control - Wikipedia

1.1. Literature review. Previous work on the dynamics and control of post-combustion amine scrubbing has mostly considered processes with a conventional reboiled stripper using the first generation solvent monoethanolamine (MEA).

Process control of the advanced flash stripper for CO2

Nonlinear Model Library. This nonlinear model library is a collection of process models consisting of differential and algebraic equations. Applications include processes from life sciences, energy research, electric vehicles, distillation, and benchmarking applications.

Nonlinear Model Library - Hedengren

A proportionalâ€“integralâ€“derivative controller (PID controller or three-term controller) is a control loop feedback mechanism widely used in industrial control systems and a variety of other applications requiring continuously modulated control.

PID controller - Wikipedia
