Stack Abuse Python for NLP: Introduction to the TextBlob Library. Introduction. This is the seventh article in my series of articles on Python for NLP.

Planet Python
Strings in python are contiguous series of characters delimited by single or double quotes. Python doesnâ€™t have any separate data type for characters so they are represented as a single character string.

Python Strings - The Python Guru
A Byte of Python "A Byte of Python" is a free book on programming using the Python language. It serves as a tutorial or guide to the Python language for a beginner audience.

Introduction Â· A Byte of Python
The variable raw contains a string with 1,176,893 characters. (We can see that it is a string, using type(raw).) This is the raw content of the book, including many details we are not interested in such as whitespace, line breaks and blank lines.

ch03.rst2 - NLTK 3.2.5 documentation
The pass_arabic_text_to_render function here is an imaginary function, it is just here to say that the variable bidi_text is the variable that you would need to use in your code afterwards, for example to print it in PDF, or to write it in an Image, etc.

Python Arabic Text Reshaper | Abdullah Diab's Blog
The variable raw contains a string with 1,176,831 characters. (We can see that it is a string, using type(raw).) This is the raw content of the book, including many details we are not interested in such as whitespace, line

breaks and blank lines.
