In today's post I focus on ideas and resources for teaching trigonometry. A recent conversation with a student made me aware that I need to change my approach to teaching this topic. I'm sure you'll agree that this is a rather convoluted method. At some point (I suspect from a previous private tutor

Krantz asserts that if calculus is the heart of modern science, differential equations are the guts. Writing for those who already have a basic grasp of calculus, Krantz provides explanations, models, and examples that lead from differential equations to higher math concepts in a self-paced format.
