Karl Popper is generally regarded as one of the greatest philosophers of science of the 20th century. He was also a social and political philosopher of considerable stature, a self-professed critical-rationalist, a dedicated opponent of all forms of scepticism, conventionalism, and relativism in science and in human affairs generally and a ...

Karl Popper (Stanford Encyclopedia of Philosophy)

Popper, Karl Raimund; 28 March 1902 – 17 September 1994) was an Austrian-British philosopher, sociologist, and psychologist. He is best known for his philosophy of science, which includes his theory of falsification and his concept of the open society. He also wrote extensively on social and political philosophy, particularly on the importance of individual freedom and the dangers of totalitarianism.
