jBpm is a flexible, extensible workflow management system. Business processes, expressed in a simple and powerful language and packaged in process archives, serve as input for the jBpm runtime server. jBpm bridges the gap between managers and developers by giving them a common language: the jBpm Process definition language (jPdl).

Digitization Activities November 4, 2009 Federal Agencies Digitization Guidelines Initiative www.digitizationguidelines.gov 4 Introduction This document attempts to define work activities relating to the digitization of original cultural materials.

Federal Agencies Digitization Guidelines Initiative

Although all of these situations potentially involve multiple concurrent instances of an activity or sub-process,

it is the first of them in which we are most interested as they require the triggering and synchronization of multiple concurrent activity instances.
